THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 10 July 2008 has been entered.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The invention of Independent claims 1 and 11 are directed, in part, towards a non-generation-time control portion that is configured to stop a generation control performed by the generation control portion if the requested electric power is lower than or equal to a predetermined value, and is configured to operate at least one of the oxygen supplier portion and the hydrogen supplier portion based on a predetermined condition regardless of the requested electric power. Manabe fails to disclose or suggest these features.

Manabe discloses a fuel cell-equipped electric vehicle that uses a secondary battery 30 in addition to a fuel cell 20 (see Abstract). Both the fuel cell 20 and the secondary battery 30 are used to supply power to an electric motor 32 provided as a drive power source during a normal condition (see paragraphs [0005], [0006], [0012]-[0014] and [0017]-[0033]). Manabe teaches

Art Unit: 1795

that during an operating state where the power generation efficiency of the fuel cell 20 becomes low, power generation of the fuel cell 20 is stopped and the electric motor 32 is driven via only the secondary battery 30 (see, e.g., paragraphs [0005], [0006] and [0012]- [0014]). Nowhere does Manabe disclose or suggest a non-generation-time control portion configured to stop a generation control performed by the generation control portion if the requested electric power is lower than or equal to a predetermined value, and configured to operate at least one of the oxygen supplier portion and the hydrogen supplier portion based on a predetermined condition regardless of the requested electric power.

Further, because the claimed non-generation-time control portion is *configured* to perform certain operations, the configuration further defines the structure of the claimed fuel cell system.

The invention of Independent claim 13 is directed, in part, operating at least one of the oxygen supplier portion and the hydrogen supplier portion based on a predetermined condition regardless of the requested electric power after the electric power generation is stopped. Manabe fails to disclose or suggest such an operating feature.

Manabe teaches that during an operating state where the power generation efficiency of the fuel cell 20 becomes low, power generation of the fuel cell 20 is stopped and the electric motor 32 of the car is driven via only the secondary battery 30 (see, e.g., Abstract and paragraphs [0005], [0006], [0012] and [0013]). That is, during this period, Manabe teaches that operation of fuel cell auxiliary machinery (which includes an oxygen supplier and a hydrogen supplier) is suspended to further save energy used to operate the fuel cell auxiliary machinery (see paragraph [0014]). Performing these procedures with at least one of an oxygen supplier portion and a

Art Unit: 1795

hydrogen supplier portion after electric power generation is stopped is contrary to the teachings of Manabe, and thus would not have been obvious to one skilled in the art in view of Manabe.

GB 1 534 015 discloses a fuel cell system that generates electric power when supplied with hydrogen and oxygen, comprising a fuel cell stack including a hydrogen electrode and an oxygen electrode that are disposed at opposite sides of an electrolyte; a hydrogen supplier portion that supplies hydrogen to the hydrogen electrode; and, an oxygen supplier portion that supplies oxygen to the oxygen electrode. GB 1 534 015 does not teach or suggest an input portion, a generation control portion, or a non-generation-time control portion. Further, GB 1 534 015 does not teach or suggest inputting a requested electric power; causing the fuel cell stack to generate an electric power corresponding to the requested electric power by controlling the oxygen supplier portion and the hydrogen supplier portion; stopping electric power generation by the fuel cell stack if the requested electric power is lower than or equal to a predetermined value; and operating at least one of the oxygen supplier portion and the hydrogen supplier portion based on a predetermined condition regardless of the requested electric power after the electric power generation is stopped.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
